Bollard

Hospitalet Inox PMR

Embedment anchoe Removable anchor Embedded base Black forged iron T-handle wrench

Hospitalet Inox PMR designer bollard, made of steel with Ferrus treatment, a protective process for iron that guarantees optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities by shot peening. It consists of zinc plating, followed by an epoxy primer coat and a final coating of forged black polyester paint for the body and white for the upper part. Trim ring in stainless steel.

Recommended anchoring: Embedded base and area rods with concrete.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
