

HEXT
Bollard

extraíble Ø114 X 800

Stainless
steel

HEXT design bollard, made of stainless steel. Fixed to the ground using a recessed base with a safety lock. Unlocking with a 10mm triangular key. Optional: with reflective strip.

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.
