Stainless
steel

Fixed designer bollard with Ø220 base, manufactured with a satin-finished AISI-304 stainless steel piston, Ø220 x 500 mm high. Surface-mounted cover, chassis, fasteners, and screws in stainless steel. Signaling with a red/green LED ring. Optional: They can be supplied in a smooth finish or with an LED light ring around the top, to improve visibility and aesthetics

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.
