product

The musical sets aim to bring joy and awake everyone's creativity and imagination regardless of their musical abilities. The playing technique is very simple, intuitive and enjoyable, which is conducive to spontaneous musical experiments. Tubes belong to the group of percussion instruments. Their construction is based on seven tubes of various sizes, suspended on a frame. To get a rhythmic sound out of them, you must hit the upper part of the tubes (covering them) with special paddles attached to the instrument. One or two people can play the resonator tubes at the same time. Just spontaneously beat out the rhythm and use your creativity to make up your own melodies. It is an instrument that provides many possibilities to experiment with music makes it possible to develop a sense of rhythm in a natural way.
