Cubeta Abatible

Inclusive Product

Capacity 60L

Stainless steel

M10 bolts fixing

CIRCULAR INOX Litter Bin, total dimensions (width x diameter x height) 465x375x885 mm, 60 liters, made of polished AISI 304 stainless steel. With a folding bucket, supported by a 40 mm diameter tubular structure with an anchoring base and rectangular plates with two 12 mm diameter holes for fixing to the floor. Prepared for anchoring with 4 M8 expansion bolts depending on the surface and project.

Optional not included: Customizable marking with 74x35 mm/80x100 mm aluminum plate.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.
