Litter Bin with lid , made with a hinged steel tub , featuring strips that leave a central space for added strength or markings. Finished with Ferrus treatment, a protective process for iron that guarantees optimal corrosion resistance. The Ferrus treatment consists of three layers that are applied after cleaning all dirt and impurities by shot blasting and consists of galvanizing, followed by an epoxy primer layer and a final coating of black wrought iron polyester powder paint. Recommended anchoring: SOFT GROUND By embedding in the ground.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
