Litter Bin

Salou

with Bucket | Inclusive Product | 40L Capacity 40L | Hard wood | M10 bolts fixing

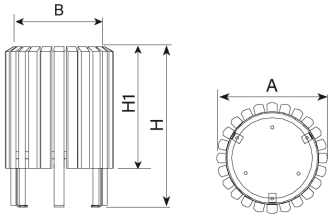

ISO 9001 | ISO 50001 | ISO 14001 | ISO 45001

Litter Bin SALOU, total dimensions (Ø x height) 460x700 mm, 40 liters, made with an interior metal structure and a galvanized steel bucket (treated with the Ferrus process, the triple-layer protector for iron, which guarantees optimal resistance to corrosion) and twenty-four wooden slats for exterior use (treated with a triple-layer Lignus coating, a fungicidal, insecticidal and water-repellent protector). Prepared for anchoring with 3 M8 expansion bolts depending on the surface and project.
Optional not included: Customizable marking with 74x35 mm aluminum plate.

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.
