Mid

Trash bag | Silver color | 70L Capacity 70L | Metal Key

ISO 9001 | ISO 50001 | ISO 14001 | ISO 45001

Litter Bin MID design, total dimensions (Ø x height): 454x800 mm, 70 liters, made of galvanized steel with inner bucket . The lid is opened using a standard triangular key. Double-layer anti-rust treatment. Zinc-plated steel sheet with polyester powder coating. Epoxy primer. Silver paint. Prepared for anchoring with four Ø10 screws, depending on the surface and project.

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
