ELA MAD 3000 designer Bench, total dimensions (length x height x depth) 3000x460x800 mm, made with a polished granite white, molded, water-repellent reinforced concrete seat, matte stainless steel frame and natural tropical wood slatted bench (treated with a triple-layer Lignus coating, a fungicidal, insecticidal and water-repellent protector). Supported by its own weight on a prepared surface.

Concrete: Reinforced concrete with a pickled and water-repellent finish. Manufactured with cement, sand, and gravel embedded within a metal structure. Shot blasting results in a high-quality, durable texture.

Gray

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.
