Container cover

Reko

REKO 2 container cover, for two containers, total dimensions (length x width x height) 3000 x 1800 x 1500 mm, made of galvanized steel and Dibond sheeting fixed to the front with anti-graffiti laminate, with personalized vinyl. Modular system that allows the creation of structures according to the number of containers or area to be covered. Prepared for anchoring with M8 screws according to surface and project.

OPTIONAL: Plastic anchor depending on the surface and project. Anchored in soft ground with concrete blocks (not included).

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
