

Corporeal letters

METAL S

VL2S

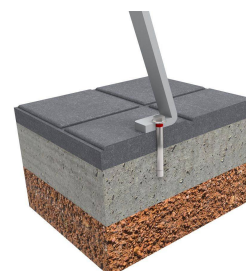

Sturdiness . Precision, strength and perfect finish.

- Letters created with 3 mm hot-dip galvanized steel sheet metal, laser cut and welded, with a baked-on powder coat finish.
- Metal base or finial with the same finish. This finial will serve as a base to support the letters and will house the anchors with a locknut at the bottom.
- This base or finial will be anchored to hard ground (wall, stone, pavement).
- If the location is on soft ground, a concrete slab will be created where the cap will be installed with metal anchors and chemical resin.
- Measurements: 1.40/0.70 m high x 20 cm deep.
- The width will be sized according to the letter.

Ref.	A	B
VL2S	700	20
VL2M	1400	20

El tratamiento Ferrus se compone de tres capas que se aplican después de limpiar toda la suciedad y las impurezas mediante granallado y consiste en un baño electrolítico, seguido de una capa de imprimación epoxi y un último recubrimiento de pintura poliéster color negro forja.

Anclaje recomendado: Mediante pernos de expansión M10 según superficie y proyecto.
