Treated pine wood

Low maintenance

ISO 9001 ISO 50001 ISO 14001 ISO 45001

Rustic Fence post set made of pine wood (treated in a class 4 vacuum-pressure autoclave to combat woodworm, termites, and insects). Prepared for anchoring in a concrete block (not included).

Pressure-treated pine wood, risk factor IV, ensuring its durability outdoors for a minimum period of 10 years. Under weather conditions, treated wood develops a warm honey-brown color that eventually turns into a natural silver-gray. If exposed to variable weather conditions, this type of pine wood may develop some surface cracks that do not diminish its durability in any way. Regarding resin and knots, it's important to note that these are part of its natural appearance.
