Set of 3 elements designed to promote safe and sustainable play in playgrounds:

Fast Slide Ref. JT05: Slide made of plastic parts (polyethylene, polypropylene, polyamide or PVC) and metal parts (stainless steel AISI-304, hot-dip galvanized steel and aluminium). Oven-painted parts with high resistance to weathering. Maximum dimensions 2908x1017x492 mm, heaviest part 65 kg and impact area according to EN1176 standard.

Seal Spring Rider Ref. JFS18: Spring rider with high-density polyethylene panels and metal parts (stainless steel AISI-304 and hot-dip galvanized steel). High resistance to impacts and weathering. Maximum dimensions 497x250x220 mm, heaviest part 16 kg and impact surface according to EN1176 standard.

Wooden Swing 2 seats Ref. JL1520000: Swing with a structure of laminated Scandinavian pine wood with autoclave treatment and finished with two coats of lasur. Includes ECOplay panels made of high-density polyethylene and stainless steel chains. Maximum dimensions 2500x90x90 mm, heaviest part 37 kg and impact area according to EN1176 standard.

All three items are made of resistant materials (laminated wood, high-density plastic, stainless steel and galvanized steel), with long durability, maintenance-free and spare parts availability for 10 years.
