

Set of 3 elements designed to promote safe and sustainable play in playgrounds:

**Klasik 5 Ref. JK005B:** Play structure with laminated Scandinavian pine posts and autoclave treatment. Includes ECOplay recycled polyethylene panels, anti-slip phenolic platforms and nets with Ø16 mm vandal-proof reinforced rope. Stainless steel and galvanized steel parts. Maximum dimensions 3340x40x40 mm, heaviest piece 44 kg, and impact area according to EN1176 standard.

**Wooden swing with 1 nest seat Ref. JL1500010:** Laminated wood swing with a nest-type seat, ECOplay panels and galvanized steel parts. Includes stainless steel AISI 304 chains and links. Maximum dimensions 2500x90x90 mm, heaviest piece 37 kg, and impact surface according to EN1176 standard.

**Piona Seesaw Ref. JFS09:** Seesaw made with HDPE panels, laminated wood, and stainless and galvanized steel parts. Oven-painted for high resistance to abrasion, corrosion and chemicals. Maximum dimensions 497x250x220 mm, heaviest piece 16 kg, and impact surface according to EN1176 standard.

All three units are manufactured with resistant and sustainable materials (laminated wood, recycled polyethylene, stainless and galvanized steel), ensuring long durability, low maintenance and spare parts availability for 10 years.
